

ASE 800 Inkjet Printer

The ASE 800 offers affordable high production printing with ink flexibility. Three improvements critical to success in the graphics market are designed into the ASE 800— fast printing speeds, thermal drying, and the flexibility to switch from indoor to outdoor ink sets.

The Ase 800 prints photo quality at 63 square feet per hour (5.9 smph). To take advantage of this fast printing speed, the ASE 800 has a thermal drying system for quick drying. That Means immediate take-up and lamination with a wide variety of inks and media.
